

The strategic dimension to tenor of religious terrorism

Reading in trends of market economy

(For the rest of the report published in the)

(www.unicomphilosophy.info)

Since smoke Holocaust global economic leakage into the open as a struggle strategy to terrorist activity and counter religious extremism and to this day mélange arbitrarily with what was known phenomena economic gaps and shifts production markets and alterations prices all these epidemics economical post-Cold War as a product to decode and re-organization of economic links and a product of technical progress in multiple spots led to the opening up unlimited marketing and the emergence of markets in any place and at any time and reached a maximum result is not a competition, but to the international production conflict in the consumer markets then fell output quality in front of tradition and fraud and to provide the cheapest and not the finest collapsed markets, followed by companies and factories producing it set the economies of countries intervened policy to rescue it and here was a Stud When the Persians made strategic alternatives to bridge the economic gaps and rang the blood in the arteries already died owners

The world reached a maximum magnitude of economic development in the history of existence through three sources for the production of energy, technology and tourism hubs central, financial income and the headwaters of the basic sound the Spirit in the economy where brought Tourism shoppers and followed by markets, products and accelerate the means of movement of the link and exalted Urbanism to contain arrivals within their all activities of business and leisure, including all kinds of Sports and hotbeds of conglomerates economic huge with a tinge International backed diplomacy strategy, but all of these activities have on tourism which made of the proceeds of the energy inventory self-products and technology logistically contained, however, that tourism in reality linked to factors environment and nature, history, and therefore to maintain the type mentioned must have Governorate first on sources bases of all that stood on to be, if possible, or for each promise a book

But where is the source of the foundations of this stuff to keep them technology this strange object eccentric is a summary of the legacy of the history of human activity flow with the movement of presence in the intellectual subconscious awareness of Applied pending stand out of existence in a society where available completeness and important to the working conditions and usually find their way to the technical style and converted into factories and handicrafts and technology products are held

its markets and laws and ways to export and significance control technology in all human development activities and Includes operations shifts physical, chemical and space activities and kinetic any applied motors and software GM and its products are all so what might have been in the era of the current then the technology has developed products and technological and multi sentence and diversity has been imitated and transfer from place to place and gland hotbeds of technological production around the world and left out secrets of control and become a developed and marketed all over the place, By virtue of energy integrated with the machine technical

Energy is necessary and essential for the development of technological and technical application factor as it needs high applied to better technology and that the energy depends entirely dependent on sources deepened in nature and can be adapted for use any derived from natural sources and is not possible fictitious or find them wherever Nothingness natural sources have Hence gland with Vogue market for the necessary urgency and concentration limited and rare delicate and despite what might have been attempts generation technology, but that is not in all circumstances and in all Loci hence energy gland lady market lady wills human Then, I got the money and brought progress and prosperity and has twice with them the calamities of energy sources and diets permission protected and looked the conflict between the misfortunes of energy and energy-makers and protectors of energy and energy markets

Even become energy and sources calamity of the ills of whole world not less miserable than the size necessary utilitarian and here is not energy alone is the machine and the reason, but the strategies the three main movement modern economy and that so we personalize it in terms of technical market, energy and tourism economy these three elements are integrated with then so that everyone could arise for the last opportunity for direct representation and not the primary presence of It's basically depends entirely on the nature and existence main may be available at some, but it may be difficult environment provide the necessary conditions to be found physically and even post-measure conditions often may prevent the exploitation of many factors in large and a substantial or obstacles may be the cause of the disaster is not taken into account at all in the day of history

Regardless of the long history even in the moments just over the reach of these moments we were day students are young and still the world then alive was the most enjoyable quotas wait professors in the classroom eagerly was the geography of the world share because it tells us as Jesus and Mohammed spoke of the paradise but McCann reality say and the fact that when he describes us Iron cities and fire on the coasts of the Great Lakes richest five lakes in the world workshops iron smelting in Lorraine and punching hard in Detroit Diary Michigan and industry vehicles and gland day the shores of Lakes kiss each of his strong helped to adapt the iron of the public may delay much since seven years running around here in search of a piece of iron or workshop to adapt the steel saves me act, even for one day they might in need for someone to break the empty workshops cement which became dens for

criminals gland So where have gone the iron the manufacturers and the markets

Until the morning yesterday, we get together and hear and see so fascinated by technology in Japan from SEC iron to the reactors, nuclear energy and we did not have heard in the history of China's people named Kalashnikov when he was the world migrate in rafts to Malaysia to begin the first steps on the runways Tigers isoforms on its way toward the sky at the tops Hancock there were markets and the world of another and still Gulf oil a young and still Dubai in phases Alsrsens The Nairobi paradise last in the footsteps of Hancock little was sphinx still ogles world look of pride that cannot be imitated in which Lance nor stone, Russia and Great hands were beyond the horizon and hand surrounded waist sun circular but if Today we look at were not stopped, but most of these things have changed for the better or the worst, why and how it will answer you, and the reason for what we have and you can trust that you also give answers

In the market square may resemble has intertwined things but these three objects are move all current files to the conflict in or around the world have long technical secrets can be transferred and held and taken are spread everywhere then escalate places and fall places then had to saved and as long as there is a rival to be access to what cryptic of the opposing party and must be mutual espionage and spying on technology products and trends in the markets that followed the cold war movement was broader and more important than Star Wars and its results markets have been destructed and deported markets and opened new markets to what is known as gap global economic Modern is the product of a strategy for economic stubbornness and not failures in the natural distribution of wealth because the human responsible for controlling the objective distribution of wealth, not nature

Spyware stage of the war any aspect of the four and is the finest that can be used in light of the strategies and modern when spying in halting the deterioration of markets technology products did not work any Give the results as part of a possible proved reading to that strategy results that the energy is disobedient Pharaoh that devour every last around it was necessary to control the sources and so to control the sources of energy, prices and trends neighbors and protection it was necessary to destabilize the countries to prevent the multiplicity of sources of production and destruction of deals to replace them new deals and to compel sources sometimes to drive more referral without high prices

Do it all become energy giant octopus extends his hand to me frowned all strategy files of the social contract the human have built the meanings of humanity which followed the League of Nations of laws and covenants then came close to abort the bulk of humanitarian laws in light of the restructuring of the world in line with the movement of the market economy and the main employers for the benefit of energy production files pending destabilize states and communities more weapons and equipment

technological required and this is what will move tech factories and also there are more technical factories and markets, there is nothing of it is forced to pay the price, permission has to be destroyed markets and must be disabled factories and this conflict of another kind

Russia strategy failed commercially and socially not communism intellectual fail but strategically boom when the incursion Arrowhead breaking citizen largest gatherings of mankind in the world and stability at the edge of capitalism protest against her at the focus of its launch, and took the Middle East from the back and landed at the Strait of Bab el Mandeb and closed entrances at Suez and Syria channel and Shove her nails in the Economic and Social centers in Africa was Libya, Ethiopia, begging and wandering in Sudan, Africa and the West, but missed all three used by capitalism cleverly and intelligently one it faces the most prestigious gatherings of cohesion ideological reactionary extends from the far Aruba and America full Middle East to Africa, Australia and secondly, through the communities in which penetrated the mostly traditional of either ideological and either still in phases far away from understand Thirdly intellectual progress that South Asia hotbeds of production, not markets for consumption and Russia relations concentrated in focuses to they don't pay but consume and not have to take Russia came out of the Cold War zero on hand as it faces an economic downturn on the technical and commercial level and divisions Internal political and social level and the crescent of fierce war militants led by the name of religion

Russia emerged from the technological, economic and military competition did not go out of the world's income from door exit counterpart China fringed wings isoforms and gland China creeps silently immemorial scary and humility and back Japan driven from the heart of the technical market to the side of the road without knowing any merits of that setback fun and announced in paralleled the fall of each technological products markets in the world swaggering Europe to reel her father declared bankruptcy rotated about all aspects of energy sources and energy markets and energy prices and energy alternatives and in fact is the beginning of the announcement of the Battle of energy and most importantly how it will be and who are heroes, but they will be victims of

That those who shot down the Great Russia from the middle of the Caucasus to the outskirts of Tajik land Do they were a fan of adventures for the sake of God or of the strongest guerrilla billable strategy and secret in the history of the world were these, and whence they came, when the revolution of Iran reached their goal Tehran were not the end of the road for the sake of God and was get rid of these fighters task tougher than the consolidation of the revolution and therefore being pushed towards Sindh Basin expensive to participate actively responded back to the fighters who Khomeini may bring them to fight with him from the basin of Sindh and walks the Kolkhoz sides Stet sects of the Islamic religion were not the first time to use the religious spirit in the political work of After a strategic global orientation and our evidence numerous style rifle for rent in the history of home groups and Muslim communities are generally familiar in the history of the Mafia and organized crime gangs globally, but it when Islamic

groups one so much more to it up to the ranks of spirit for sale and not just gun for rent only

When you agree with me that I pay you my soul and all my life to death and you or your client will pay me well-being later in the sale and purchase agreement incomplete and there is a text recognition that God has bought from the believers themselves that their Paradise and also there is the argument and who have sold themselves to God permission to prescription sale and sail the human psyche crime forbidden by all international laws or our cash and as long as this is the style used in the activities of jihadist Islamic organizations, the operations jihadi is selling the forbidden originally in international law, that is, they slavery itself and that God is the principal and Contact Person for the sell-off was buying this, the evidence of history and even the events of this today prove that the activities of jihadist groups, past and present are related to the benefits and interests of political and economic strategies or points of criminal often has nothing to do with religion at all, but stands behind the religious groups which is incorporated by devising programs of work, direction and reap the benefits of the proceeds of their activities and often with Escape may vary from her hand or Abandoned them and make their way as gang organization in the dress of religion or may contract with related interests of other strategic or even total control of the ranks of countries across platforms and politics in the democratic platforms Or armed revolutionary action or even military coup

I have read from the archive for Sheikh Lebanese mountain origin and who was wandering in the area extending from the Fertile Crescent to the Persian Gulf in the late eighteenth century to the early nineteenth century and about his relationship with the British governor Richard Lion Heart and how it was managed by a group of suicide bombers under one of Titles Sufi Islamist groups and works gangster gun system for rent and how he was rewarded for the liquidation of political opponents of the number of bodies conflicting then was defines the systems and countries in a timely manner and his Suicidal were bombers storming castles and forts, killing ministers and social activists and competitors Sufi sheikh mountains is one of the pictures that reflect the historical use of the substance of religion and Islam in building terrorist activities for the implementation of the purposes of political and economic strategy

Reached Caliphate State of Turkey's Muslim peoples through their access to the heart of Africa through Egypt, Sudan and the goal of that incursion is to control on the headwaters of the Nile and the sources of economic resources such as gold, slaves and ivory and already when reached to those the listening Almost lead to focus on the slave trade that leads to some nationalities to the extinction such as the Nubba tribes Inqasna and some ethnic groups, which lies on the outskirts of the equatorial forest and the owners of hangars slave and financiers of slave hunting groups in Africa are mostly of Fame home of Islamic known later Sufi families working in the field Islamic call to deploy we know them in our societies August and grandfathers who are so far supporting the Islamic-oriented in politics and usually it may support and are working to consolidate and focus rulers who come from such as the application of the

laws of Islamic has yet advance and driving in favor of political power in exchange for receiving of gifts and benefits of economic, this unit of the factors that birth to entrench and consolidate the system of the Islamic trend in Sudan, despite the failure to all files and strategy division of the state on the basis of ethnic and religious, not political to ever nearing the three decades

Look this is what we call it that were not interest Capitalization are driven activities based on the Islamic items that the system who leads a relentless war on the side of Saudi Arabia in Yemen and the first to sever its ties with Iran, which was a sponsor him in reckless circumstances boss is still the same person, which is still the same system that shelter and save and trained and distributed all leaders and groups jihadi in the world, including basic commands like Benn laden and al-Zawahiri, this cannot be unreasonable and not though the Saudi regime itself plays on all the ropes, using laws and Islamic texts hooks and nets for fishing by the atmosphere at times in salt seas and sometimes freshwater lakes and live on what takes on the proceeds from this historical inheritance I would not have used Islam to form a military gathering of nations at a time that the other party in the war are also Muslims from this use is a strategic political and not religious divine purpose

The strategic use of the substance of Islam in the interest of political, economic is a profession all Muslims Shiites were or age so she Living tool is not relevant metadata links beyond human capacity even if one goes to the latest sources which Smartest the blood in the arteries of modern terrorism are the Muslim Brotherhood who rise in Egypt, led by Hassan al-Bana Then expensed to Sudan to come out of them regime governing Sudan since thirty years as an alliance of groups Islamic movement and global as the most secure shelter and center and grandfather activists Islamists around the world were able to them and through them to move and activate all what happened and being from terrorist acts current and for three decades have seen for myself the Iranian Cultural Centre huge central residential communities in the city of Omdurman at the intersection of Wad al-Bashir and the popular market and they say that the Muslims of Sudan year and Sudanese President alliance with Saudi Arabia against Iran because the funeral practiced by Iran in Sudan, including the Cultural Center of Iran twenty years Instilled a knife in the heart of Sudanese citizens Is erected for baking or what they were doing

Entry Sudanese, along with Saudi Arabia in its war with Iran in Yemen did not come out as being mercenaries war any gun for rent if it intervened in both cases on the Saudi side or Iran side or that there is no diets linking the Sudanese there are no interest and was convicted and cannot Bashir that uses assigned to the establishment of an Islamic army there Van based in Sudan army is Islam Army and not a state army and that Iran is created by rations and armed than our right to wonder Are able battleships Iranian Port Sudan will not wait to respond because I do not need it, but what should the world know to what extent used the phrase Islam in the complicated marketing vehicles and pay thousands of lives and interests of all B, they are incapable of expression because who Riding emergence of these invested organizations in the field of ideology Islamic are the smartest criminals in

human history and who is not of that class that he is not ridding but will become the legs and hoofs to that scourge, which they are ridding without an end

Sudanese President al-Bashir is nothing but a mere soldier in the ranks of the Muslim Brotherhood in the Sudanese army, which has been around to militia and regulatory now used by the whole weapons of rent and this is the pattern on which the Muslim Brotherhood since their founder Hassan al-Bana I read before twenty years from the date of the emergence of Islamic movement and I am a student in the middle stage was the writer talked about how starch Muslim Brotherhood and who is Hassan al-Bana and who are the owners of T-shirts Greens in Egypt's history and how they derive their livelihood from foreign embassies in Cairo by Hassan al-Bana has strengthened this as mentioned by the former leader of the Egyptian Jihad Organization sexual Nabil Naim, who was in Sudan on the side of bin Laden and others under the auspices of the Sudanese President al-Bashir and his regime and still-Bashir says he may boil for God of that kind, but what we seen even then what did and what he said when he became Morsi as president in Egypt, when Islamists Tripoli income after Gaddafi

The interests of politics and policy interests of the right does not fall in the regulations of legislation and laws, not even necessary to enter into our theme here for as long as our conversation about God and workers based on the texts, but unfortunately we find the whole world is at risk based on the agents activities are entrusted to work for anyone who is not with us while revenues These activities go to destinations we know they live among us and who pay the costs of these activities are also legged here and earn what they pay for these agents also from here and the victims of these divine activities are also innocent people are staying here and maybe we So all things being from its sources to its mouth here, why cannot address I cannot be here because everyone traitors and everyone is afraid than they do Capitalization interests phrase has been associated with sales and marketing personality and allegiance to God as if between God and men Stock Exchange brokers half of the world and the rest of the marketing tools

People will not write about the fact that the fighting and fighters in Afghanistan only after the Magic turned when they penetrated their stage for the second Jihad, which in investigations after them said they hadn't know what to do or where to go and will not accept them until their countries, which went them to come back to it after the end of the first phase against the Soviets and so they decided to start Second stage against the God who created them and the security of their livelihoods over the years and in hearsay some of them also said one of the participants in the television investigations have indicated that Saudi intelligence is the primary source of financing has told them that the mediator who was accountable for funding when they protested to him to hold the assembly passports and delivered to Saudi intelligence These are all at the beginning of the first phase of the jihad against the Soviets So these beginnings were Sunni exchange presence and funding and Landry on how far the Shiite presence, but the Muslim Brotherhood were there signal spokesman to their deployment in the aid agency and

the Islamic sites ration and financing

The Agency for International Relief Islamic is the activist organization in most cities in the world and the indications are that he is from the Office of fundraising in the capital of the world, but was in her joints one of the elements of the intelligence service of the State concerned controls in all Entries and exits and us sufficient evidence that the Muslim Brotherhood are the ones who control the agency's World Islamic breaks relief has proved history and practical activities and situations constituent previously and at present that the Muslim Brotherhood are in close deal direct contact with embassies and agencies to countries far from the stated principles of the Muslim Brotherhood as that contained mostly trading in the field felt strategy files either security or politics or economics, however, that all these indicators rose in periods associated with the issues and events historically influential in the world movement and often it conflicts between opposing parties in thought, strategy and religion and every time you find Muslims Players Brotherhood are central in on the side of a new party against another and they originally nothing to do with whom the subject cause of the conflict, but enough all this by placing them in the role of the gun for rent

The world has known millionaire Osama bin Laden's Saudi citizenship and Sunni road engineer founder of excavations famous Abu Abdullah Contracting leader organizing the international norm is not the leader of the founding of the base is not involved in the beginnings of what is known as jihad Afghan But he suddenly appeared in the middle of the way for a boom abnormal till the end, in the history of the events and the history of the whole world and so it was bin Laden is considered a turning point in the marketing development for the use of the idea of the Islamic religion in the interest strategy of the market economy and first applied to an actual investment of Islamic Jihad in the global market conflicts openly to serve strategic purposes unrelated to the idea of God is not religion at all has been condemned and intercepted all the world later

Authors US and British wrote composer and interpreter has been written we read in English and Arabic and later hearsay and interviews TV Clamor by YouTube videos, all talked about bin Laden and the organization Al Qaeda and how and when formed and who is Bin Laden and those of his family and how starch until tomorrow universally fiercest of their dearest friends and partners economists Over that the stranger road from the ground sand flat to mountain peaks and its grooves to calm and rough as well as the space, including directly to the underground sea and it said we buried it did not Shake the dust from our hands until who trembling hearts of the whole world to hear talk only with him went out and not to see him Shopping is not the slogans of Allah and Islam and religion account, but this stuff merchandise on marketing table knocks her bells cheapest prices for those who pay the price

This new Sprite we will discuss later on we do not know which one snake and whichever crust snake but both daunting in all circumstances while still secrets diets commercial leader of the Islamic Caliphate State distant I read in the interpreter book into Arabic for correlated between the bin Laden family and the family of George W. Bush arrived in the mutual visits end between the two families and that these unusual in human societies also refer to the deep to the brother of bin Laden, who lives in one of the countries European and the family of George W. Bush and commercial activities of their relationship I do not think that the overlap between the people a crime, whether commercial or last as long as upholding a paragraph in any of the legal texts, but this trend evolution in the other paragraphs of the book, citing trading company global shareholders in which ministers and heads of countries and companies for technical industries and export equipment companies Construction of a large number of countries in the world was in the forefront of Abu Abdullah Contracting Company, based in Saudi Arabia and owned by the bin Laden family on the impact of these new developments him Eng. Bin Laden's old company management to his brother and is able to state Arab Emirates where he established bin Laden company for fossils, which includes group of bin Laden Contracting If gold comes to the latter trend will be the thrust of modern terrorism in the name of Islamic Jihad is not just a mere plot commercial in the Battle of the market but also why Islam and not others religions permission loophole found in Islam itself and then that all humanity is ready to assume the mistakes of a particular our

Author continued in that the money collected for the establishment of that company International Gat by US intelligence and passed through the Saudi intelligence and the payment to bin Laden, who was working in the area of the excavations in the Arab Emirates to cover real project that will do against the Soviets in the Afghan Turapora Mountains and the role of the engineer bin Laden digging tunnels under the mountain ranges and the role of technology companies and other supply of arms and equipment and combat Thus the Soviets packages in Tajik nations and the land Caucasus information published on the pages of a number of books, but in my analysis I see that it's more complicated than this much in the end Defeated the Soviets were taking bin Laden a lot of money does All of this, including other costs of the war, funded by the United States and whether Saudi Arabia was paid throughout the war against the Soviets and what are the proceeds of that war to those countries and that Afghanistan gland other country used Arabia under the name of jihad for a Muslim state in the war disassembly and attrition between America and the Soviets used with Spirit jihadist extremist in that the war strategy of the global dimension But in fact it's a business deal with economic and strategic dimensions There were resellers and buyers and brokers in the center and the goods people are looking for well-being and life after what they were a commodity so popular and prosperous achieved above market gains, but for those who

The spokesman narrative biography of bin Laden, who brought him the unanimous decision of the Mujahedeen after vacuum leading role in the organizational work incidence has been collecting Stet Arab fighters in Afghanistan under one command is al-Qaida, led by bin Laden, who was supported in Gat proportion to the large number of Arab fighters from the Gulf region and the mid-Jazeera Arab what

is also due to him by the grace of when to pay Jihad costs expenses and he Contact Person him directly adopted was generous pay enough I personally don't know that there was a mix up or is the evolution of events in the form of jumps mixed so don't know said bin Laden had gone to Afghanistan Mujahid or an engineer or an investor, or was brought to perform a task in any case hard to find what did looking for the millionaire son of a wealthy family that was looking for a luxury in Tora Bora or is it that the mountains of the search for money behind him going out there and that there were grounds for revenge is avenger of Russians or the Americans or is it the most important and crazy colorless seen vision and strategic goals only from behind Jihad and didn't know fact of struggling or why labors so the whole world and kill everyone then Everyone killer him

We said yes strategic push the Americans to bin Laden and his associates Mujahedeen to extract Russia from the world but who's paying for these to extract America from Bursa world have commented on the neck of Saddam Hussein's son Freemasonry International the Baath Party and the leader of the Arab atheistic principles and orientations So where Islamic Jihad from here Bin Laden acknowledged and adopted But is Saddam admitted so Indicate me read analytic early on that the Link between this world-like-from New York to the island of events Bali to Nairobi as part of conflicts market shifts International named after what happened in conflicts technology markets and gatherings economic global markets such as tigers isoforms and others have I have focused my attention on the aspects of accusatory to the citizen emerging markets in both Qatar and the Arab Emirates and even China that she was to be financed and directed terrorist groups in indirect ways at all to destroy the markets and vacation destinations rival in the light of emerging markets at the time as alternatives for energy resources endangered marketed and Headwaters Yes This is a fact you may not, but where the evidence and proofs

Yes, we are not directed accuse anyone, but we are not afraid to ask from behind the sky to the ground pending shown us our readings strategy out there and that alliance Saddam Hussein Freemason with assets Sunni with bin Laden's terrorist with assets Sunni to hit the World Trade Center in New York in retaliation for America that drove Saddam from Kuwait Shiite income for the full fine fight Shi'ites in Iran, bin Laden was born and raised and the foundations of its programs terrorist and financed from Saudi Arabia center and airstrip year FINE stands God here if you see? So prohibitive for We do not see that not Things came on the same pattern since that day and to what happened the night of this Today theatrical personalities are the same people from the Leningrad to Sydney and Taipei to Amazon and tools are the same theater technology, energy and tourism modern tools of factors alternatives to the market engines

Saddam, who was representing nations have used for secular against Islamic groups that establishes and supports terrorism and pour the blood in the veins of Saddam has gone and stayed terrorism exists why because terrorism tool in conflicts of energy markets while Saddam victim in conflicts of energy markets

but the first victim of the heavy caliber while the biggest victim in conflicts energy markets is Gaddafi and the most amusing victim in conflicts tourism markets is Hosni Mubarak and envelopes victim in conflicts energy markets is Ali Abdullah Saleh, he said that most of the indicators directed towards Qatar as though not the main player is the player most dangerous, which move all of these characters and financed all operations to bring down most of the energy resources petroleum, gas and gatherings nature tourism in the Middle East and Africa for the benefit of tourism and marketing its alternative to fluctuations in the energy Expected markets and controls on all this through regulations Muslims and some Islamic groups that have found them a safe haven in Sudan where he established adjacent to the University of Africa and the global center in Khartoum, southern organization Brotherhood and distribution of the roles and performance of this project has been built on over the years succeeded him what happened in Libya and Egypt, but developments circumstances jealousy streams events

Qatar has provided the greatest gifts the Islamic regime in Sudan in exchange for its projects in Africa, which culminated in the assassination of Colonel Gaddafi and change the regime of Hosni Mubarak Muslim Brotherhood and even today that the military presence of the Sudan in Yemen on the side of Saudi Arabia is a country representation and driven by Qatar and not Saudi Arabia included gifts Qatar Islamic regime in Khartoum assassination of Colonel John Garang which is the balance and save it in regain control of the Heglig oil and continue to support and finance notch opposition to the government in southern Sudan assignable without the establishment of a developing country on the side of opposition leader assassination of Darfur, Dr. Khalil Ibrahim and help the regime diplomatically and militarily and financially to dismantle the armed movements in Darfur funded Qatar also the settlement of Arab nomads in towns that have been displaced by the population in the days of armed conflict Yes to Islamic groups that adopt jihadist projects even if it's marketing tools for strategic sale, but among them are carrying ethnic proportions two elements strategy is also implemented through the use of Islamic Jihad projects

I am in analytical Qatar has yet to adopt these projects and Islamic groups and Ethnic For their religion, or tribe and not only Islamic but Qatar adopts militant groups in Africa is not a Muslim have nothing to do with Islam at all Qatar used groups extremism, ethnic in control of the resource centers and sites of the dimensions of a strategy for economic and marketing for the use of either the keep these areas shaky and either impose the hegemony of proxy were not Qatar have stopped these projects but he developed methods treat them after a fierce censured by him than most counterparts from the Gulf states and most of the media, international agencies And that would have caused to the diplomatic prestige of North Korea and Iran today The virtues of each country projects from media to tourism and markets and that his plans because stifles tourism in situ from the far north of Africa through Egypt, Israel and the Fertile Crescent, Syria and even Turkey and then converts it for the benefit of its fabricated tourism and emerging markets but turned them automatically towards Arab Emirates that proficiency fishing in water turbidity and long will this period of directed surges of chill winds that move the stagnant water

That confirms the conflict on tourism and markets are terrorist attacks subsequent to the sites where the concentration of tourism and global markets through history did not sulk seeing one attack in citizen emerging markets such as Qatar and Dubai, although it most incursion in these issues and weaker security obstacles possible to prevent the arrival of terrorism, he said targeted foreign tourists and places of crowds marketing in places of tourism and global markets where tourism markets targeted and not the people that implementing terrorist operations they don't know any content of the dimensions of the strategy of what they do but carry out at the direction of the contractor who contract agreement with the party or state what to put one area of the world in a state of security conditions agreed upon and paid the price in the end the collapse of the global market or tourism activities for the benefit of another country where there will shift to the pioneers

If fighting against each other and the uprooting of the other right of the other and kill who disagreed with you in thought and faith and the captivity of his wives or until the sale is terrorism, terrorism exists and is permissible in Islamic texts and Islamic history and practiced at all times, not today under the name of laws and Islamic not last and is acceptable to all the silent of believers Islam as long as no reject it officially I challenge Muslims all that go out consolidated version legitimacy mistakes that were committed against humanity on behalf of the laws of Islamic history and agree to all of them and provide historically offer apology written as it did the church with the issue of Galileo and the issue of girl Orleans in France on the side of the other historical issues These things are the affairs of Muslims are not our affairs because they know who will pay the price in the end, but the fact that to become the texts of a specific religion agenda for groups Fight funded and backed deal economically recognizing the countries in the UN Security Council with this unless he has arrived it mafia or international organized crime gangs in American countries Latin permission for the United Nations does not withdraw its membership and its recognition of the states that prove their dealings with religious terrorism

Fingers are often corrected towards Iran in light of the modern religious extremism but in fact Iran does not only play a role of strip wall While it's a source of slaughter It is not real home of the holders of knives, but the stupidity of political behavior that shape diplomacy of Iran is that stain the outer landscape and make it in the form of the altar, while the World know the Persians home of nation and history more than any of the mullahs and scholars of the unknown who sit pegs? fastens legged Iran Progressive Yes there are political attempts with a religious dimension and that there is a religious attempts with a political dimension does not have one of which serve the interests of Iran's strategy in the light of market struggles in terms of economy and energy Tourism and Iran, however, it is possible that the pole is a pioneer if you understand what you need leaders fact the Iranian people have exceeded the region and the world and international issues Iran long distances

In the end and are we ultimately does not then we are still if halfway technical markets struggle in a kind of semi-balanced stalemate though that America is still likely cuff which is reeling, and China, which does not flinch at that sells you a piece of pottery from among a dozen steel Here is struggling with the most expensive breath while Japan in a closed room perhaps room for surgery Russia suffer cancer in the technical Germany industrious limited her heart skill and the rest stood at the balcony watching Will live technology markets of New not in the in need in that we are witnessing a larger number of victims of wars for their Boss Spirit in machinery warlike markets We want to reduce the heat emission is no need for more auto markets also will be conflict in the finest markets, fuel-efficient and that the conflict quality is healthy competition may reduce the filthy competition in technical markets, however, technical markets do not constitute the most serious safety human conflicts in global markets Although the creation of armed political conflicts in most part of attempts to move the technology markets, technical plants and this is another type of negative marketing, not markets struggle

Conflict experienced by the world now are conflicts energy prices and markets and confiscated and secured and secure ways of distributing the challenge posed by price fluctuations, up or down is that birth to get rid of the multiple creation of armed groups, sources strategies to prevent the stability of the situation and the optimal use of And optimal use of some sources have found the promoters of this task what they're looking for in groups for sale and rent Organization under concepts and Islamic texts have been using them already successfully in other strategic issues related to conflicts technology and politics and international markets then organized, financing, arming them and then use them successfully in Africa and the Middle East has succeeded in incapacitate sources of energy in the countries that have been active in

As far as may treat citizen sources of energy states available rates using existing terrorist groups Islamic texts resorted consumed sources to overcome the market system and the purchase of terrorist groups cheaper prices without any controls or laws but created terrorist groups mission control of the sources of energy and sell them all over the place, becoming a source of energy For most countries in the unknown risk in these circumstances and the loss of confidence in the primary sources, which supplies the world powered Gat America to secure its position by declaring the use of oil reserves with extraction of what is known as the oil and fossil only from side internal use and seemed to export to the outside and rang the Jinx the doors of people who rely entirely on sources financing for oil and reinforce this fear with the validity of information sources that oil may throw at any time in the spot what it is not eternal and results were alternatives to the idea of tourism, building global markets

But tourism is not based only on the factors associated with mainly the environment, history and commercial markets by high mega does not only gatherings and tourist Gat idea of the researchers about alternatives to not to hit all the birds with one stone was that stone and again Islamic terror groups that claim in its agenda to fight phenomena Forbidden in the canons of Islamic This game is so

dirty systems in its landmarks and tourist activity prominently began using these groups lease and purchase of both by cash have discovered or to provide supplies and documents and methods of scrolling to enable control of the reins of a country or undermine it for their transformation of Tourism and the markets to their advantage this is what is happening today and this all What is behind what is known terrorist groups that are moving under the name of Islam wherever they found does not have a group in the world bearing in its content and its agenda the word Islam namely hidden Activity from behind a commercial enterprise invests in the field of religion and the worship of God does not hesitate to destroy any state or society for the sake of its agenda investment And that these Islamic groups and they arrived in the major interest only and dispersed as a result of betrayal, indoor led to killing violent themselves or sharp quarrel without an end in the same style crime gangs and who has a critique of what you wrote for traces the history of the agenda Islamist groups in detail before responding to what is written here
